

KUSJAY

Full-Stack Developer · Next.js · Laravel · Supabase · [jaydev.my.id](#) · Bali, Indonesia · [officialkusjay@gmail.com](#)

Crafting performant, accessible digital products — from landing pages to full-stack apps.

EXPERIENCE

Freelance Full-Stack Developer — 2023 — Present

- Ship small, reviewable diffs — Next.js + Supabase (App Router, Server Actions, RLS) and Laravel + Filament (R2 · GDrive backup).
- Built e-commerce, task board, weather & inventory apps — notion-to-ship with AI-assisted workflow (Hermes, Codex).
- Principles: fewest round-trips, reversible actions, readable states.

TECHNICAL SKILLS

Frontend	Next.js · React · TypeScript · Tailwind · Framer Motion
Backend	Supabase (Postgres · Auth · Storage) · Laravel · Filament · Node.js · Go (gateway)
Ops & Tools	Cloudflare R2 · Docker · Vercel · rclone · Git

SELECTED PROJECTS

E-Commerce App · Next.js · Supabase · Tailwind

Retry-safe checkout, cart Server Actions, RLS per user.

Task Manager (Kanban) · React · Node · Socket.IO

Realtime board — DB as source of truth, sockets for presence.

HIMA TI Platform · Laravel · Filament · R2

Association portal — Microsoft campus auth, Filament admin.

Weather Dashboard · Next.js · Open-Meteo · MapLibre

City search, 7-day forecast, cached map layer.

EDUCATION

Undergraduate — Informatics · In progress

Coursework & projects above reflect hands-on full-stack work alongside studies; stats and claims in portfolio stay honest.
